Driven TT Rearsets for 2016 Kawasaki ZX-10R
Part#: DRP-723
INSTALLATION INSTRUCTIONS

Installation

NOTE: ALL PIVOT POINTS MUST BE TIGHTENED USING BLUE LOCTITE AND AN IMPACT GUN.
To retain the use of the rear brake light switch a separate M10 X 1.25 aftermarket brake light switch (not included) will need to be used.

Shifter Side
1. Install foot peg in frame bracket.
2. Install shift rod.
3. Install frame bracket onto bike.
4. Adjust shift pedal with shift rod and tighten both safety nuts.

Brake Side
1. Install foot peg in frame bracket.
2. Connect master cylinder plunger to brake lever using OEM cotter and pin.
3. Install frame bracket to bike.
4. Install master cylinder using 2 m8 bolts supplied.
5. Use blue Loctite on all bolts and torque all to required setting.
6. Make sure nothing interferes with proper operation of motorcycle.

Make final adjustments as necessary and re-check all hardware after the first 500 miles of use.

Removal

Shifter Side
1. Remove OEM shift rod from bike.
2. Remove frame plate from bike.

Brake Side
1. Remove 2 m8 bolts holding heal guard.
2. Remove master cylinder plunger pin and retain split pin.
3. Remove 2 m8 bolts and remove frame bracket.
4. Remove rear brake switch and disconnect it from bike.
